

# AI in the Classroom

AI is a tool that can help you learn and create. But it's important to use it responsibly and ethically.

AI can be used to generate text, images, and code. It can also be used to analyze data and provide insights.

AI can be used to create personalized learning experiences for each student.

**REMEMBER**  
Misusing AI is cheating!  
Know the rules  
Talk to your teachers  
Reference clearly
